donors of art and photography.

\$10.00 SUGGESTED DONATION AT THE DOOR

AT COSTA VERDE INTERNATIONAL SCHOOL, OUR MISSION IS TO INCITE LEARNING THROUGHOUT THE COMMUNITY.

As an elementary school with initial grades from preschool through 6th, our aim is to produce healthy, happy and well-adjusted life-long learners. Our target is that each child acquires fluency in a second language and a profound understanding of the necessity for a "green" approach to living. To achieve this, CVIS is dedicated to a small student to teacher ratio and has focused education on the whole child in an environment designed to develop the talents and skills particular to each individual. School curriculum centers on ecology and respect for the environment. Students learn to analyze and solve problems, rather than simply memorizing facts.

Our International School is just the beginning. Our goal is to provide all ages in our community with a location to find knowledge. Through our Sustainable Resource Center, our mission is to get the people of the community to find the changes they feel are important and to make those changes. Through our Cultural Center, our ambition is to provide adult education classes, art showings, theatre, a public library, and other learning opportunities for the community. We want to expose our amalgam of families to art, culture, and knowledge from around the world and to inspire the entire town to become ecological.

The proceeds from this event will go towards providing Costa Verde International School with Green Energy and Hot Water, and serve as a working model to initiate change and sustainability within the community.
